

國立臺北護理健康大學106學年度碩士班招生

語言治療與聽力學系碩士班

溝通障礙學導論試題

申論題 5 題（中文或英文答題皆可）

1. Please explain the meaning and differences between “language difference” and “language disorder” first, and then describe how you would identify language difference versus disorder in bilingual children. (20%)
2. Please describe and compare the characteristics and major differences between patients with aphasia and dysarthria. Please also give each term an example. (20%)
3. Please describe the meaning and differences between a phonological disorder and an articulation disorder. Please also give each term an example using phonological inventory. (20%)
4. Please define the following terms and give each term (1) one example, and (2) a pure tone audiogram (including both air and bone conduction):
 - (a) Conductive hearing loss (6%)
 - (b) Sensorineural hearing loss (6%)
 - (c) Mixed hearing loss (8%)
5. What is central auditory processing disorder (CAPD)? What are the characteristics of CAPD? (20%)
