護 理 系 博 士 班
研 究 法 試 題

注 意	1. 請用 <u>中文或英文</u> 作答。 2. 請標明題號依序於 <u>答案卷</u> 上作答。
-----	---

It is believed that patients will increase their capability of performing self-care behaviors if they obtain healthcare information. You are interested in examining the effect of patient's self-learning by reading educational materials versus one-on-one teaching method provided by the nurse on patient's self-care behavior. Please answer the following questions according to your interested area:

1. What are your study purposes, research questions or hypotheses? What are the research variables (including conceptual definitions and operational definitions) ? (25%)
2. What is the study design? How are you going to perform data collection? (25%)
3. What kind of statistical analyses are used? What is your rationale for each analysis? (25%)
4. What kind of ethical issues should be concerned for this study? (25%)
